Hands-Free Retention Harness

AXBTH-NIS

Fits Select Nissan Models 2006-2020

The following Nissan vehicles come equipped with a Bluetooth® connectivity module that must be bypassed when installing an Axxess SWC interface (sold separately) in order to retain the hands-free buttons on the steering wheel.

Maxima	Under rear deck in trunk	Xterra	Under front passenger seat
NV200	Behind glovebox		

INSTALLING

1. Install and program the Axxess SWC interface, then test all buttons for proper function.

Note: Hands-free buttons will not work until Step 2 is done.

For Axxess SWC interface instructions, please refer to the AXXESS website: <https://axxessinterfaces.com/>

2. Locate the Bluetooth® connectivity module, disconnect the 32-pin harness, and then connect the AXBTH-NIS to the harness removed.
3. Test that the hands-free buttons now function.

Note: Ensure that the phone is paired to the aftermarket radio.
