

Amplifier Bypass Harness

Fits Select Ford Models 2011-2020

FEATURES

- Vehicle-specific harness to bypass the factory amplifier
- Saves the installer unnecessary labor and wire
- 20 gauge wires
- Wire Length: 12"

Refer to the following pages for the vehicle specific instructions for wiring connections. Wiring connections vary per vehicle. Please note that there are (2) different wiring harnesses included, and the instructions for each harness will be listed.

If it's uncertain whether the vehicle contains a specific speaker or not, test the wires with a tone generator, or check to see if the factory wires are populated on the vehicle side. Alternatively, the wires can be tested for impedance with a multimeter.

APPLICATIONS

FORD			
Explorer (Sony [®] or non-amplified).....	2011-2018	Explorer (Sony [®] or non-amplified).....	2011-2019

TOOLS REQUIRED

- Crimping tool and connectors, or solder gun, solder, and heat shrink
- Tape • Wire cutter • Zip ties

Visit AxxessInterfaces.com for more detailed information about the product and up-to-date vehicle specific applications.

CAUTION! All accessories, switches, climate controls panels, and especially air bag indicator lights must be connected before cycling the ignition. Also, do not remove the factory radio with the key in the on position, or while the vehicle is running.
