## **ATRDT-R** MICRO2 ATR DUAL-SLOT BLADE RIGHTWARD FUSE TAP

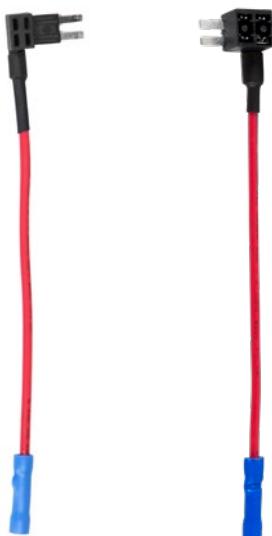

**SALES** 386-257-2956

What is a rightward fuse tap? This fuse tap has a right facing prong. If you are looking for a left facing fuse tap, please see our part number ATRDT.

### PRODUCT OVERVIEW

These right-facing fuse taps are a convenient solution for adding 12-volt accessories such as radios, LED lighting, cameras, or other devices to any vehicle with a standard fuse slot. These rightward fuse taps make it easy to hardwire electronics directly into the fuse box when there is limited space or an obstruction on the left side.

**ATRDT-R** - Right Facing    **ATRDT** - Left Facing

### Features:

- Each tap provides two fuse holders: one that protects the existing circuit and a second to protect the new circuit
- Allows for installation of additional circuits without splicing or cutting
- High-quality construction for durability, flexibility, and improved electrical conductivity
- Max input: 20A per fuse
- Universal vehicle applications
- Convenient 10-pack
- 1-year warranty
